

Davide Pedron

Software Engineer | 10+years in enterprise systems and interactive development
Passionate game developer; fluent in English, French and Italian

Happydev - ***Software Engineer & Game Developer*** - Remote (France)

Oct 2025 - ongoing

Delivering full-stack web applications and browser-based interactive experiences for clients across Europe. Automated testing and deployment via GitHub Actions and Cloudflare.
Published 10+ small projects (all links available on my portfolio or my itch.io page).
Currently working on a narrative-driven adventure game, using Godot (expected public demo release in Q2 2027).

Pubstack - ***Software Engineer*** - Remote (France)

Oct 2022 – Apr 2025

Collaborated in a 10-member tech team using the **Shape-Up** methodology. Developed and optimized core features using **Rust and TypeScript**, ensuring high performance and scalability. Led **Research and Development (R&D)** efforts by prototyping new features and performance optimizations, working closely with the product team to validate them.

Thread Solutions - ***Analyst Programmer → Tech Lead***
Trento (Italy, on-site until 2019) - Remote (France)

Mar 2016 – Sep 2022

Started as a **MuleSoft developer** and transitioned to a **T-shaped** role, specializing in **Java**. Served as **Tech Lead** for a **learning management system (LMS)** project for three years, overseeing architecture, development, and team collaboration. Gained experience across teams and methodologies, including **Scrum**, **Kanban**, and **Waterfall**, adapting to diverse project requirements and workflows.

Livello7 - ***Game and Experience Designer*** - Remote (Italy)

Feb 2013 – Nov 2019 (Freelancing while employed full time during this period)

Pursued experimental **game design projects** with the team of Urban Games Factory alongside full-time software engineering role. Built transferable skills in real-time interaction, event orchestration, and immersive UX that informed subsequent enterprise work.
Key Projects:
- **Critical City Upload**: Lead of the "SuperDojo" team, responsible for developing and running an Alternate Reality Game (ARG) for an elite player segment (~50 players).
- **Incognito Battleclash**: managed immersive live-action experiences for 100+ players.
- **Magellano @ Best-Conference**: contributed to game design for a conference-based interactive experience (200+ attendees).

Phoenix Informatica Bancaria - *IT Support* - Trento (Italy)

Sep 2009 – Feb 2016

First-level support and system administration on legacy mainframe infrastructure. Early exposure to large-scale distributed systems.

EDUCATION

I.T.I. Marconi - *Electronics & Telecommunications Technician* - Trento (Italy)

2001 – 2006
